(Indicate if funds have been secured) _____

Specific location of the project: _____

Partners working on the project (if any): _____

Please address the following topics and questions with detailed yet concise descriptions and answers. Each response should not exceed 100 words.

- Describe the background of the problem or why the project is warranted.
- Please identify your statement of need.
- State the goal of the project. SCIF is particularly interested in how this project will meet an unmet scientific or management need.
- What are the specific, measurable objectives of the project?
- Describe the specific methods that will be used to meet the objectives.
- Outline or describe a detailed project timeline.
- Discuss the expected results and deliverable(s) of the project.
- Explain how this project benefits the overall conservation of a species or habitat.
- Describe any additional social, political or economic benefits of the proposed project.
- Are there additional administrative elements, such as obtaining a permit from a third party, that are needed before a project can proceed?
- Please discuss the qualifications (*vitae*) of your organization, project administrator, and/or partners to complete the project.
- If a scientific research project, please list any key references from the primary literature that supports the background of your project and validates the statement of need and methods.

Application Submittal Information:

Please send your completed application to the SCI Foundation office in Washington D.C. at the following address:

Matt Eckert
Manager, Science-Based Conservation Programs and Research
Safari Club International Foundation
501 2nd Street NE
Washington, D.C. 20002

Safari Club International Foundation will only consider projects that support a sustainable-use philosophy.
